Infor SyteLine – Get business specific

Infor SyteLine is the solution of choice for over 5,000 manufacturers around the world. From repetitive to engineer-to-order, Infor SyteLine enables the processes you need to accelerate production and meet customer demand more quickly. Infor SyteLine enables you to:

- Increase customer satisfaction
- Plan and schedule order by order
- Increase forecasting speed and accuracy
- Minimize error-prone manual steps
- Deliver orders on time, every time
- Reduce inventory levels and shortages
- Leverage innovative technologies

Packaged with smart functionality to address the key challenges manufacturers face today, Infor SyteLine requires less customization, shorter implementation time, and fewer IT resources to maintain. That means an immediate (ROI) return on your investment, and lower (TCO) total cost of ownership over the long term. From the very first day, you'll see improvements in visibility and transparency of data to address your challenges. The solution's lean planning and scheduling capabilities provide the latest in demand pull algorithms, but also honor traditional lean pull parameters, enabling you to achieve the best of both lean worlds

Infor SyteLine supports continual change as manufacturers strive to maintain their competitive edge and adapt their business processes to continually meet customer promises, demands and business-specific requirements. Specifically, Infor SyteLine provides:

- **Advanced Planning and Scheduling (APS)**, a fully integrated, lean advanced planning engine that synchronizes material and capacity to customer orders with real-time available-to-promise and capable-to-promise capability.
- **Product Configuration** to ensure configured orders are accurate for the customer and feasible for production.
- **High level of personalization** ensures that the system is convenient and easy-to-use, putting the needed information and functions literally at the fingertips of each user based on industry, duties, and responsibilities
- **Field Service Management** to build long-term customer loyalty and satisfaction
- **Quality Control System** helps reduce costs by reducing labor, scrap, burden and other non-value adding activities while improving quality and meeting customer expectations
- **Workflow** to drive consistency and completeness, enhance communications, and simplify processes for cost and time savings

Infor SyteLine is the extended ERP solution that allows manufacturers to compete successfully against time. Infor SyteLine software provides the means to connect sales, marketing, manufacturing, financials, suppliers, customers and service providers. In addition to the base ERP applications for managing customers, suppliers and the plant, the following fully integrated applications are available to complete the enterprise system that's right for your business needs:

- **Supply Chain Management** quickly integrates supply chain partners to improve operational performance, materials flow, and flexibility
- **Enterprise Asset Management** proactively manages assets, asset information and maintenance contracts
- **Product Lifecycle Management** integrates engineering with production and support for the life of the product
- **Supplier Relationship Management** goes beyond simple procurement to full communication and collaboration
- Rules-based, parametric and multi-level sales **configurator** (with unlimited attribute descriptors) rapidly and accurately configures and dynamically prices complex products
- **Enterprise Performance Management** solutions including Business Process Applications and Business Specific Analytics for promoting effective business decisions
- **Constraint-based production scheduling** with mixed model order sequencing provides production flexibility and manages frequent order changes
- **Integrated maintenance management**
- **Outsourced operation** planning, reporting and tracking capabilities

Solution Map:

Financial Management
- General Ledger
  - Multi-Currency, Site & Language
  - Consolidations
  - Allocations
  - Eliminations
- Accounts Payable, Accounts Receivable
- Assets & Expense Management
- Project & Cost Accounting
- Re-Valuations, IFRS GAAP

Performance Management
- Dashboards
- Business Intelligence
- Financial Reporting
- Planning & Budgeting
- Analytics

Human Resource Management
- Human Resource Management
- Payroll (US Company)
- Benefits Management

Projects and Resource Planning
- Activity tracking
- Fully Integrated to GL, AP, AR
- Budgeting
- Milestone Billing
- Microsoft Project interface (import/export) & add-in
- Labor and expense reporting
- Project Change Tracking
- Alerts
- Reporting
- Multi-Currency

Supply Chain Planning & Management
- Sourcing & Procurement
- Inventory Management
- Shipping/Receiving
- Master Item Data
- Bills of Materials
- Multi-Site
- MRP & MPS
- Scheduling
